

RYAN STEWART

Creative Professional

Interactive Production — Design / Build / Display

Interactive Design / Front-End Development / Hands-On Installation

Texture Said LLC, Independent Vendor / 2023 to Present

- Deliver UX/UI design and front-end development for agencies, museums, and exhibit builders, creating intuitive, high-impact digital experiences.
- Build responsive websites and interactive interfaces focused on accessibility, performance, and clear visual communication.
- Integrate BrightSign, Nexmosphere, sensors, and display hardware into museum and retail installations, ensuring reliable, on-site functionality.
- Lead projects from concept to installation — sketching, prototyping, engineering, configuring, and deploying complete digital-physical systems.

Web Manager

Delaware Valley University / 2019 to 2023 **Doylestown PA**

- Led a comprehensive website redesign, enhancing user engagement through intuitive usability and captivating visual design.
- Managed core web pages, optimizing performance, accessibility, and user experience through expert web architecture and content strategy.
- Implemented a project management tool to streamline campus requests, while collaborating with external vendors to drive digital innovation.
- Collaborated with agencies & vendors integrating features, updates, and widgets.

Adjunct Professor

Sacred Heart University / 2016 to 2018 **Fairfield CT**

- Designed and delivered two post-graduate courses, covering the creative process and advanced multimedia technologies.
- Lectures and studio classes, guiding students through project-based learning to developing technical skills, creating sophisticated materials.

Interactive Product Designer

NBC Sports Group / 2012 to 2016 **Stamford CT**

- Spearheaded UX/UI design for NBC Sports Group's digital properties, boosting usability and user experience.
- Created engaging online content, interactive features, and visual designs for web, mobile, and marketing materials.
- Developed comprehensive UX/UI solutions, including style guides, prototypes, and responsive designs.

Web Designer

ryan@rstew.art

I am an Emmy Award-winning designer and engineer with nearly two decades of experience building interactive systems. I handle the entire journey of a project. From the first digital sketch in the lab to the final hardware installation on the workshop floor. I act as the bridge between a big creative vision and the technical execution needed to make it work in the real world.

Achievements
